

Privacy Policy

PaperBoat Games (종이배 게임즈) | Hero Wing

Effective Date: July 9, 2026

1. Overview

PaperBoat Games (종이배 게임즈), a sole proprietor ("Developer", "we", "us"), operates the mobile game Hero Wing (the "Service"). This Privacy Policy explains what information is collected through the Service and how it is handled.

Hero Wing is a standalone game with no backend servers operated by us, and we do not directly collect personal data through accounts or registration. However, third-party SDKs integrated into the Service (advertising and analytics) may collect device information and usage data, as described below.

2. Information We Collect and Process

PaperBoat Games does not collect personal information that directly identifies you, such as your name, email, or phone number. We do not operate: - User accounts or registration systems - Login or authentication services

Game save data (scores, settings, progress, etc.) is stored locally on your device. Where cloud save is used, see Section 6 (Google Play Games Services).

However, the Service uses the third-party SDKs described below for gameplay analytics (to improve the game) and advertising, and these SDKs collect and process device information and usage data (see Sections 3 and 4).

3. Third-Party Services – Advertising (Unity LevelPlay)

Collection and Mediation The Service serves advertisements through Unity LevelPlay, an ad mediation platform operated by Unity Technologies, through which ad networks including Unity Ads and ironSource deliver ads. These advertising SDKs may collect the following information to serve and measure ads: - Advertising identifiers (Google Advertising ID / GAID) - Device information (manufacturer, model, OS version) - IP address and approximate location - App usage events and ad interaction data - Network connection type

Rewarded Advertising The Service offers optional rewarded ads. Watching a rewarded ad is entirely voluntary, and declining to watch ads does not restrict access to the core gameplay.

Opting Out of Personalized Ads - You can limit ad personalization through your device settings. (Android: Settings → Google → Ads → Delete Advertising ID or opt out of Ads Personalization) - Users in regions requiring prior consent, such as the European Economic Area (EEA) and the UK, are asked separately for ad personalization consent on first launch. If you do not consent, non-personalized ads may be served.

Reference: Unity Privacy Policy — <https://unity.com/legal/privacy-policy>

4. Third-Party Services – Gameplay Analytics (Unity Gaming Services Analytics)

Collection To provide and improve the game Service, the Service uses Unity Gaming Services (UGS) Analytics, an analytics service operated by Unity Technologies. It may collect and process: - Device information (model, OS version, app version, platform) - A pseudonymous analytics identifier (a randomly generated ID that does not directly identify you) - Gameplay events (stage progress, in-game actions, in-app purchases, etc.) - Session information (play time, number of launches, etc.) - Approximate (country-level) location based on IP address

Purpose The collected data is not used to identify you individually. It is used solely for statistical purposes — to analyze and improve the game's difficulty and content, such as understanding where players drop off.

Consent and Your Choices - Users in regions requiring prior consent, such as the EEA and the UK, are asked separately for analytics consent on first launch. You can still play the game if you decline. - In other regions, data is collected based on your acceptance of this Privacy Policy and the Terms of Service. - All users can opt out at any time via the "Analytics Data Collection" option in the in-game settings menu, and may request deletion of collected data via "Request Data Deletion".

Reference: Unity Privacy Policy — <https://unity.com/legal/privacy-policy>

5. In-App Purchases

The Service offers in-app purchases, and payment processing is handled through Google Play. We do not collect or store your payment method information (such as card numbers). Processing of payment-related information is governed by Google Play's policies.

6. Google Play Games Services – Cloud Save

The Service may use the cloud save feature of Google Play Games Services (PGS) to synchronize game progress across devices. In this case, game save data is associated with your Google account and stored on Google's servers. Such processing is governed by Google's Privacy Policy — <https://policies.google.com/privacy>

7. Children's Privacy

The Service is not primarily directed at children. We do not knowingly collect personal information directly from children under the age of 13.

The advertising and analytics SDKs provide configuration mechanisms for compliance with regulations concerning children (such as COPPA), and we configure each SDK in accordance with the applicable guidelines. Parents and guardians of children under 13 are encouraged to reset the advertising ID or disable personalized ads on their child's device through the device settings.

8. Google Play Data Safety

The following information is disclosed in the Google Play Data Safety section: - Data collected: Advertising ID, device information (advertising SDK) / app usage and gameplay events, pseudonymous analytics identifier, approximate location (analytics SDK) - Data shared: Shared with third parties (such as Unity Technologies) for advertising and analytics purposes - Data encryption: Encrypted in transit - Deletion requests: Handled via resetting the device Advertising ID and the in-game "Request Data Deletion"

9. Changes to This Policy

We may update this Privacy Policy from time to time in response to changes in law, SDK updates, or service changes. Updates will be communicated by revising the Effective Date on this document, and for material changes we will provide prominent notice within the Service.

10. Contact Us

If you have any questions about this Privacy Policy or our data practices, please contact us: - Email: paperboathelp@gmail.com - Business Hours: Monday–Friday, 09:00–18:00 KST (excluding Korean public holidays)

In the event of any conflict between the Korean and English versions of this Privacy Policy, the Korean version shall prevail.
